

Our university is the First among other Iraqi Universities and exceeds Universities of Ohio and San Francisco

It is not usual that our university becomes the first among other Iraqi universities as long as it exceeds repeatedly more international universities like some American ,European or Canadian universities. With what the university has achieved of scientific achievements with its local or Middle East counterpart universities the results of its achievements and statistics are many and the codification of the results, achievements or its display on the mass media needs a long pause, follow-up and effort that the university saved for scientific aspects more than those of media. President of the University of Baghdad, Alaa Abdul-Hussein ,within the scientific renewed and developed contexts formed a specialized committee to follow up the rankings and instructed within unique new contexts like the adoption of further measures and developed mechanisms globally that our university is the first to work with The President of the university held a lot of expanded meetings with several senior scientists and experts , engineers and specialists in the assessment and activities of digitalis and computing Works , as well as the university planned a study and an innovative mechanism to get more unique scientific victories that befit the status of the University of Baghdad and its long history among the rest of Iraqi or Arab universities, or some created or newborn universities that our university provides more experience to develop and improve their positions in the international rankings , where the University of Baghdad, has contributed to and provided most of its services to many of the websites of the ministries and institutions, both formal and informal in Iraq, to enter international categories. Our university still shows preparations in the service of all educational institutions,

governmental and non-governmental organizations to develop performance at websites, and also confirms its full readiness to provide the bulk capabilities, expertise, energies and efforts of scientific or applied in the service of the Iraqi society, which represents its high and noble aim at all scientific stages, which the university president focused on in many of the meetings with the staff of computerized effort instructing that our university powers should meet the needs of the Iraqi labor market which is waiting for a lot of achievements capable of productive change for the better or improvement and development, so that the university will be always and forever in the service of the Iraqi society. Our university received a lot of congratulatory messages that blessed our scientific efforts. The Iraqi government within the successes of our university last year, has expressed repeatedly its great interest of the University of Baghdad, and followed-up such international rankings. Many congratulations and appreciation letters came to our university, the most important of them is from the Presidency of the Republic, which provided presidency shield for our university, the presidency also received a large delegation of our university to express interest of the university where Dr. Khodair al Vice President received the President of our university and his delegation. We received as well as congratulations from Mr. Nuri al-Maliki, the Prime Minister, who blessed our efforts and progress. Furthermore, thanks from Prof. Ali al-Adeeb, Minister of Higher Education and Scientific Research, were received who often visited our university and inspecting conditions to provide support and assistance in order to be advanced and distinctive globally. Our University gained the first rank among other Iraqi universities last July edition ranking where more than 21000 international universities included. It gained the first rank among other Iraqi universities with new series "Openness Rank 1940- " "World-Rank- - 5570"

"Excellence Rank- 3278". Our university imposes its presence again as an Iraqi unique individual university within the world classification of QS, which came this year according to the new criteria of evaluating and according to selections that the rest of all Iraqi universities and many Arab, Asian and European universities have never worked with. The classifications of our university in the QS within the "SURVEY INDICES": **211 RANK** and by: **61.10 SCORE, +- 701**, and then our university maintains its position in the rankings as one of the best 700 global universities among more than 25 thousand universities in the world, to excel the prestigious American universities such as Ohio or San Francisco and other world prestigious universities. Between applied and theoretical aspects considering the modern humanitarian structure that serves the society and its noble message, our university once again has gained advanced centers as usual among other Iraqi universities in the international rankings where it gained the first rank ,with the grace of Almighty God ,over all other Iraqi universities in the international "Webometrics Ranking" and "QS".

A German professor Delivers a lecture in Our University He states during his lecture in our university : " I liked University of Baghdad because it is advanced and developed "

University of Baghdad makes a number of non -class scientific activities for both professors and students simultaneously to make the researches take an advantage of the international experiences inside the university to make the researches take an advantage of the international experiences inside the university of Baghdad .With this orientation the university hosts from time to time a group of thinkers and rare scientists internationally .Within its scientific progressive project the university hosted the German Professor Dr. Karl Kramer to deliver lectures about the theory of cognitive development and communication at the hall of Ali Al-Wardi at the center of development and continuing education in the university -Al-Jadirriya compound and with the presence of a representative of the university president, Dr. Kadhem Al-Omran ,Dr. Muhannad Al-Lami, the director of the centre and members of Baghdad Provincial Council. President of Baghdad University Prof. Dr. Alaa' Abdulhussein Abdulrasul received and welcomed Professor Karl Kramer expressing his delight of the guest's communication with our university and his dealing with international modernist and developed topics. Furthermore, the university president expressed in an interview with the website team the ambitions of the university and its strategies in the exchange of expertise and scientific visits of visiting professors

between the University of Baghdad and the other universities in the world .The cultural and intellectual exchange programs should be in various scientific disciplines, focusing on the most Modernism aspects internationally , pointing out that our university is dealing with most scientific disciplines , including the rare disciplines and those that go with the latest developments .He also expressed that the history of the University of Baghdad and its originality make it be in the foreground or in the most distinctive centers. We have a lot of researchers and scientists who have made and continue to provide more scientific expertise to the rest of the universities. There are a lot of professors from the University of Baghdad who deliver many scientific lectures in the most prestigious universities in accordance with the visiting professor principle or within the cultural exchange programs between our university and the other universities. Prof. Dr. Karl Kramer professor of anthropology at the University of Vienna, Austria, delivered many lectures in our university about many subjects in the field of communication and perception and knowledge, where he explained in his first lectures, the basis of upgrading and evolution " perception and communication" and he also delivered a lecture about the language of perception and embodiment, as well as about the movement of the body and communication , a lecture on gestures of the human behavior , depending on the modern programs and advanced aids to reinforce the concepts and ideas he presented during his scientific lectures. In an interview of our website with Professor Kramer, he expressed his admiration and delight to be in our ancient and large university , noting that the University of Baghdad, is one of the biggest universities, and it has many beautiful flowers and gardens that help and contribute in achieving the educational process and stimulate knowledge and logical thinking. He ,furthermore, expressed his cooperation and desire to provide more experiences for our university, which he described beautiful , and that the cooperation will

continue to provide more experiences, exchange and development of knowledge. Dr. Muhannad al-Lami, director of the development and continuing education Center, explained for our website that the center is going on in its cognitive and cultural exchange of hosting international developed expertise. Our centre is preparing for further scientific activities , conferences and seminars with an international dimension , by hosting several international expertise that have a large experience in the field of education and development of knowledge , by contrast, our university is achieving more exchanges with the most prestigious universities , where our university sent a delegation of a lot of professors and experts to many universities in the world in order to provide scientific advice and deliver lectures .The website team attended Ali Al-Wardi hall and take a set of photographs for the lectures of the German professor Dr. Carl Kramer.

Impact Factor of the University of Baghdad Exceeds universities of Iraq and the Middle East 809 international researches and 42 patents in just two years within the world's best researches

Prof. Dr. Alaa' Abdulhussein in an interview with the website team explained that the university is proceeding with its scientific Progressive project of the distinctive scientific researches of the "Impact factor" and our expectations are the number of patents and published researches internationally will increase, according to the effect of a series of measures and procedures that we follow at the university as well as dealing with all our scientists and researchers. At the time we have provided all the possibilities, means and scientific supplies for the all researchers, we emphasized in the University Council on the important decisions about the quality of researches and the followed mechanisms, assessing and publishing the researches and the academic journals, where the university is keen to have researches with distinctive quality and value to serve the society and labor market, achievements should serve the interests of society. Dr Ahmed Waheed Nasir ,Director of Scientific Affairs ,explained to our website that the university turned greatly for all scientists and researchers devoting the concept of assessment for every scientific activities and encouraging them through the privileges granted to researchers and inventors, where the university gave letters of thanks and appreciation always for both discerning inventors and researchers as well as providing them great support in their researches and contributions of conferences. The university president instructed that the university took all the subscription and accommodation expenses

of inventors or those with researches of impact factor, without mentioning that the university has the capacity and capability to provide all laboratories and supplies of researches and modern equipments to conduct researches and completed them inside Iraq. For the researches that require qualities of laboratories and supplies or equipment, the University shall send them outside Iraq to complete their researches in the laboratories of the university that is desired by the researcher or the supervisor of the research. The university is sending more researchers in the postgraduate Studies, as well as some of their supervisors to Europe or America or prestigious international universities to complete the writing of the researches and updating their Scientific experiments which reflected positively on the quality of researches and being excellent academically or practically where the results appear superior and promising always,. God willing, we have a lot of researches carried out by our scientists in the laboratories of Baghdad University and its scientific fields and we are waiting to be completed soon so that we make it accessible to students and researchers in order to make use of them in their theoretical or practical studies. The Website team has prepared another report for modern laboratories of the university and its researchers and documented them with a set of pictures and film scenes .They will be displayed it in the program of "harvest of the university", which displays on the university channel, and our website will display all the episodes on the website and the "You tube".
