

### New Appointments to more than 540 Employees

With care of the staff of the university and the continuous work even outside office hours , fundamental work and preparations have been conducted to issue orders of appointment for new employees of the top students and who are working in the form of contracts and the returning academic competencies of various disciplines, where administrative assistant formed operations room at his office to resolve the issues of appointment as soon as possible, in order to appoint about 550 employees, between a university professor and an employee, where meetings were held successively in the Office of the Administrative Assistant Professor Hussein Yousef , which contained several points including appointing the staff of the daily wages for workers since 2011 and below, the re-appointing of the academic competencies returning to Iraq and the appointing of the tops of colleges and institutes for 2011-2012 / 2012 - 2013. The applicants have been selected and all the submitted transactions to the university have been checked. All the conditions, central requirements and valid instructions have been applied. Dr Hussein Yousef in an interview with the website explained that the record will be submitted to His Excellency the Minister for approval and then meet the due process, Dr Hussein added that Mr. university president has instructed that the proceedings should be as soon as possible, ordering the formation of a committee of specialists from Department of legal Affairs, Administration and Finance, auditing and financial control with the presence of Director of Studies and planning, Mr. Samir Mohammed Jaber, who has explained that the work is going on in full swing to complete the appointments as well as the over time work continues and the workers with us in the Committee are making extraordinary efforts in order to complete

the procedures, besides that our university has adopted the best programs systems in the management and auditing of files and transactions and then inserted data according to the latest developed technology in order to save time and effort . He has also showed that there are directives of giving interest to the academic competencies and medical groups and to consider the cases covered by the recruitment and sporadic, and if we completed this record and has been approved by His Excellency the Minister, there is a new record we will prepare once ratified to appoint a new group. We would like to show that all the new appointments are of the university staff exclusively and we always seek to serve the society through the slogan of the university "the university is in service of the society". The website team accompanied and followed up the committees' work to document it with a set of photographs.

The seminar was opened by reading a verse from the Quran and after the word Mr. president of the university of Baghdad, which praised the seminar and the importance of administrative reform, which are well known to one which stems from a fundamental position which is how the evolution of institutions that have become the need the need to bother after years of development and be based on the data in order to be true in the future is also valid. The president of the university to the University of Baghdad, is the main campus of ancient that came out a lot of leaders and scientists are still the University of Baghdad, is a distinct professors and students , stressing on not to get away from the development taking place in the world with management and administrative development of the people in particular, and we have all the material and moral of this development and and the transfer of the permanent properly, and then delivered by Dr. Salah

Abdel-Qader al-Naimi, minister counselor for management and strategy, which included several axes, namely the activation of the evidence of powers and devolution of powers and simplify work processes and the preparation of leaders of the administrative capable of leading institutions efficiently and effectively and to develop organizational structures and administrative decentralization and human resource management and the development of human resource skills physical and moral and public administration using modern technical means and solving technical problems, administrative correspondence and the use of electronic correspondence and operate on the principle of reward and punishment.

### Distinctive activities and international conferences of the college of engineering

The college of engineering participated in Erbil conference held by the United Nations in Iraq to discuss the advantage of excellent and talented academic minds outside Iraq and attracting them to supplement the Iraqi universities and participate in postgraduate studies. The workshop is made with the participation of the college of engineering - university of Baghdad, Sulaimaniyah university, the university of Irbil, Mosul university and the university of Basra. Professor Dr. Saba Jabbar Ni'ma - head of the department of architecture who has been sent to deliver a lecture exposing the scientific, educational and research activities of the college of engineering. The workshop has approved some important recommendations for its success of and what flourishes the educational process at universities and to develop postgraduate studies. Within the activities, the consultative group of the instructors of the college of engineering participated to discuss the final designs of the airport project of the Middle Euphrates with the ministry of transport and the French company in Beirut the final diagrams of the airport project of the Middle Euphrates in cooperation with the concerned consultant. Professor Dr. Saba Jabbar Nima - head of the department of architecture, long-practiced Professor Dr. Bahgat Rashad Shaheen - department of architecture, Prof. Dr. Qais Saeed Sabbagh - department of computer engineering and Prof. Dr. Sidqi Ismail, director of engineering division at the university of Baghdad. Related to this, the department of architecture in the college of engineering, university of Baghdad organized an educational exhibition to definition architecture engineering and the nature of the study with its first phase requirements in order to make them to see the nature of the possibilities that are available in the

department and the definition of curriculum and requirements. Dr. Saba Jabbar, head of the department, said that architecture engineering is an art and science of designing and constructing of buildings to cover the materialistic human needs (such as housing) or moral needs by using suitable materials and methods of construction. She added that the field of architecture extends to different aspects of knowledge and humanities such as mathematics, science, technology, history, psychology, politics, philosophy, social science and art as overall. It has mastered also aspects of culture such as music and astronomy. The head department indicated that architecture engineering is closely related to fields of designing cities and urban planning, civil furnishing and interior design. What is required from the architect in the design phase is complete and detailed visualization of the project and a link to nature, traditions and customs of the region and to find a suitable formula of the design to interpret the needs of the users of the place later.

**With the presence of media men, academic and official figures, the activities of the fourth university media week is concluded**
